

EKS Technical Documentation

Dear Sir or Madam,

Thank you for your email.

We hereby confirm that the products listed under "Appendix 1 – EKS compliant products" comply with the applicable legal and regulatory requirements listed below, as amended from time to time.

1. REACH Regulation (EC) No. 1907/2006

Our products are articles within the meaning of the REACH Regulation. We use exclusively polymeric materials that are free of residual monomers and are exempt from registration and notification requirements pursuant to Article 2(9) of the REACH Regulation.

To the best of our current knowledge, our products do not contain any substances included on the European Chemicals Agency (ECHA) Candidate List of Substances of Very High Concern (SVHC) in concentrations exceeding 0.1% by weight (w/w).

Should any Candidate List substances be present in reportable concentrations in the future, we will fulfill our information obligations under Article 33 of the REACH Regulation and, where applicable, our notification obligations regarding the SCIP database.

2. RoHS Directive

Our products comply with the requirements of Directive 2011/65/EU (RoHS II) and Commission Delegated Directive (EU) 2015/863 (RoHS III). The restricted substances specified in these directives are not used above the permitted concentration limits.

3. Conflict Minerals

Our products do not contain conflict minerals originating from conflict-affected or high-risk areas, or the applicable requirements of the OECD Due Diligence Guidance are fulfilled. This applies in particular to tin (Sn), tantalum (Ta), tungsten (W), and gold (Au).

4. Regulation (EU) 2025/40, including PFAS

Our products comply with the requirements of Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR). This includes compliance with the applicable requirements regarding the use of per- and polyfluoroalkyl substances (PFAS) and the permissible heavy metal content.

The combined concentration of lead (Pb), cadmium (Cd), mercury (Hg), and hexavalent chromium (Cr(VI)) does not exceed the limit value of 100 mg/kg (100 ppm) established by the Regulation.

5. Recyclability

Our products are recyclable. The materials used have been selected to enable material recycling and thereby support the requirements of a sustainable circular economy. Actual recyclability depends on proper collection, sorting, and processing within the available recycling infrastructure.

6. Additional Legal Requirements

Our products also comply, where applicable, with the following legislation:

Regulation (EU) 2019/1021 on Persistent Organic Pollutants (POP Regulation)

Regulation (EC) No. 1272/2008 (CLP Regulation), where applicable

Directive 94/62/EC and Directive (EU) 2018/852 (Packaging Directive)

California Proposition 65 (USA), where applicable

To the best of our knowledge, our products do not contain any substances restricted or prohibited under the above-mentioned regulations in concentrations exceeding the applicable legal limits.

7. Validity

This declaration is based on the legal requirements in force and on the information provided to us by our suppliers as of 06 July 2026.

This declaration shall cease to be valid if relevant legal requirements change or if new information regarding the materials used becomes available.

Tönisvorst, 06 July 2026

Ernst Kraemer & Söhne
GmbH & Co. KG
